Tutorial
Expression-Statement

Based on the initial code of Assignment 4, modify CodeGenerator.py and Emitter.py to implement the following questions:

Question 1.
Generate code to print a float number. Modify CodeGenrSuite.py to test your code.

Question 2.
Generate code to print a binary expression with 3 operators: +, - , * and only integer operands. Modify CheckerSuite.py to test your code.

Question 3.
Generate code to print a binary expression with 4 operators: +, - , *, / and integer and float operands. Modify CheckerSuite.py to test your code.
